INFORMATION SYSTEMS CONSULTING

BUSINESS INTRODUCTION

Technology is a great enabler, yet, it requires a great deal of preparation, agility and focus in order to realise its full potential.

As economies around the world digitise their processes, it is imperative that businesses of all sizes adequately prepare for the fourth industrial revolution.

Introduction

Launched in 2019, Jojo Addison Consultancy is a privately held enterprise registered under the Ghana company registration laws.

With over 20 years of experience in technology development in varied capacities, the team of experienced and sharp energetic youth have the requisite know-how to deliver excellent services tailor made to meet peculiar needs.

Our motivation is solving business and societal problems with state of the art internet web based software technology, electrical and electronic installations at a fair cost.

Mission

We are in the business of building the capacity of businesses and individuals to remain competitive and grow regardless of size, sector and scale.

We offer solutions to problems to boost confidence, efficiency and Competitiveness using modern web based internet technology.

Service philosophy

We believe in going beyond expectations of our clients.

So we tailor our client relationship beyond the immediate business.

We look into the consummate needs of the customer so as to offer custom made bespoke solutions, because we know that one size does not fit all.

For each customer, we go through thorough cycles of business case analysis, mockup planning and review sessions, implementation, testing and feedback evaluation loops, documentation, presentation and training on all our deliverables.

We also pride ourselves with excellent customer support at client's convenience.

Indeed, we go the extra miles because our growth is tied to the individual growth of our clients.

We support business productivity with

- High expertise
- Financial cost reduction
- Time efficiency
- Flexibility and scalability
- High availability

Our software and IT-Engineering competence covers

- Electrical & Electronics Engineering
- Software Engineering
- System Engineering
- Social Engineering
- Cyber Security Engineering
- Visual Media Engineering
- Project Engineering
- Financial Engineering
- Business Engineering

What we do

- **Bespoke solutions**

Many businesses faced with problems of friction in the market may not find easy solutions from an off the shelf approach. We come in to fix broken integrations with custom solutions that fit your business needs and budget.

- **Hitech readiness**

Current market shake up indicates that businesses that are hitech ready stand a better chance at overcoming challenges with digital agility. We provide you with simple, cost effective tools that guide you through your digital journey to hitech readiness, enhance productivity and secure your business.

- **Capacity building**

With an ever changing marketplace, where customers are increasingly becoming sophisticated and demanding, it is imperative that every business keeps up ahead of the curve.

We provide you inhouse and virtual training to boost your personnel capacity.

You can also count on us as an extension to your inhouse team and enjoy elasticity in meeting growth in customers demands and profitability. Because, you're as good as your team!

- **Capacity constraint**

Finding a competent local team versed in hitech demands of software and hardware installations, maintenance and repair can be a daunting challenge. Knowledge gaps constraint projects take off and sustainability. Bringing all team members to a know-how level so as to facilitate a project requires patient training and mentoring.

We offer platform services that remove friction and enable your team to develop your solution efficiently and within budget.

Service portfolio

- **Digital transformation and Paperless transition**
- **Project consulting and management**
- **Electrical & Electronic Installations and maintenance**
- **Medical Equipment installation and maintenance**
- **Solar Energy installation and maintenance**
- **Physical perimeter electric security fence installation**
- **Operations monitoring and ongoing support**
- **Infrastructure and asset managementInformation security compliance consulting**

Target market

- **Banking, Finance & Insurance**
- **Real Estate**
- **Oil & Gas**
- **Haulage and Transportation**
- **Health & Hospitality Service**
- **Defence & National Security**
- **Communication**
- **Transportation**
- **Health & Education**
- **Agriculture**
- **Institutions, Commissions & Authorities**
- **Private residences and businesses**

Software service

- Website design, development and hosting
- Software design
- Software architecture
- Software development
- Software engineering
- Software maintenance
- Software analysis
- Software testing
- Software support
- Software training

Information technology consultancy

- Business analysis and conceptions
- Data collection and collation concepts
- Business exposure and organic growth
- Customer relations management
- Data processing and visualization
- Business process digitization
- Information systems audit preparation (ISO compliance)
- Qualitative analysis
- Geographic information systems
- Infrastructure and digital asset management systems

Installation, Repair and Maintenance service

- Solar Energy
- CCTV & Electrical Fencing
- Electrical and Electronic Equipment
- Laptop, Desktop, Servers & Network devices
- Hospital and Medical Laboratory equipment

Training

- Business process change adaptations
- Practicals business digitization journey
- Data extraction, transformation, storage and visualisation
- Digital base maps
- Information security management systems
- Electrical and Electronic systems
- Medical equipment and systems
- Solar energy equipment

Portfolio

Software Research & Development

Cyber Threat Intelligence

Cyber Threat intelligence is a solution that aggregates data from disparate sources into a correlation engine, enriches them with parsed metadata, analyses the data with prescribed rules and visualises the data in various ways possible. It is built with state of the art technologies including Elasticsearch, Kafka, Logstash, D3, Kibana, PhysicsJS and Bootstrap HTML5, AngularX and Spring Framework.

IBEX

Internet Based Exercises is a platform for conducting practical training of professionals in situational awareness distributed in remote locations.

Situation Room Dashboard

SRD is a platform that demonstrates the situation room of a security defence operations center.

Data Intelligence platform

Data explosion, particularly public user data over the past decade has grown into an important source of insight for varied stakeholders including government security and intelligence agencies and businesses.

Big data as it is coined, embodies information that can be exploited using the appropriate tools that crawl the internet to extract, transform, load, analyse, profile and visualize the data.

The punch intelligence platform is one such platform for handling big data in a consistent and efficient manner.

HMI - Desktop, Tablet & Mobile

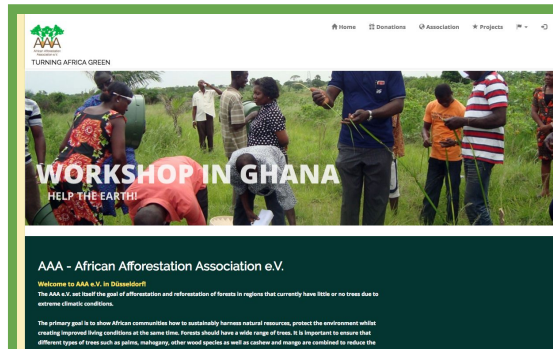

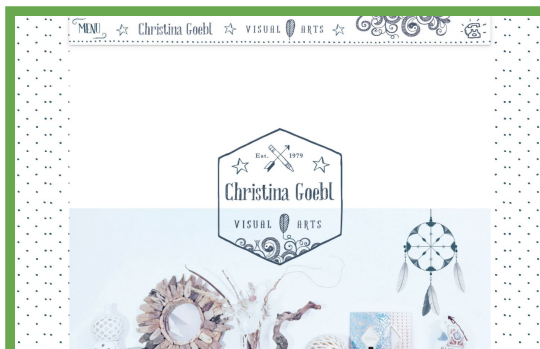

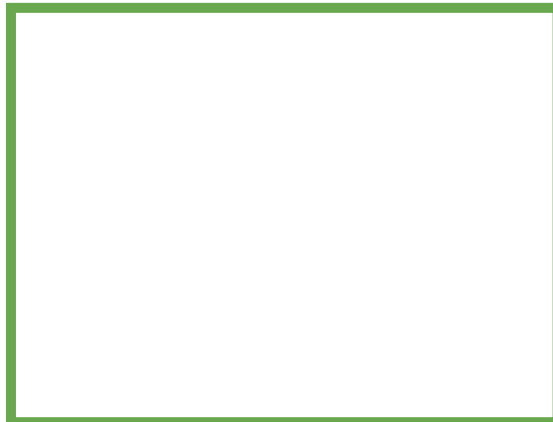

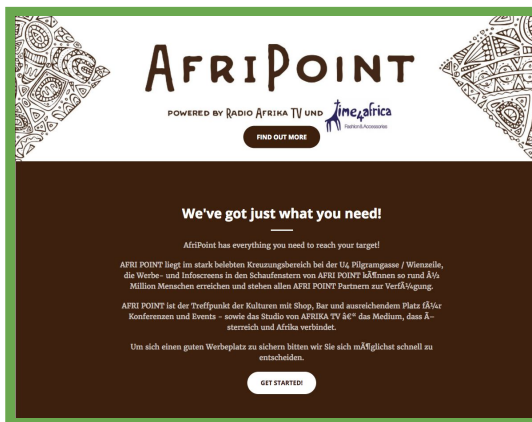

Notifications - Near real-time message alerts

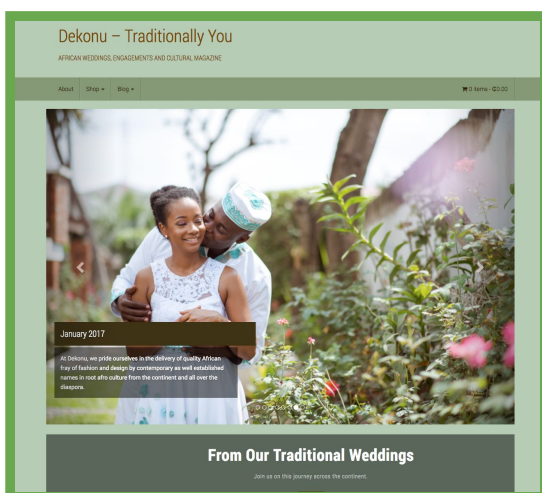

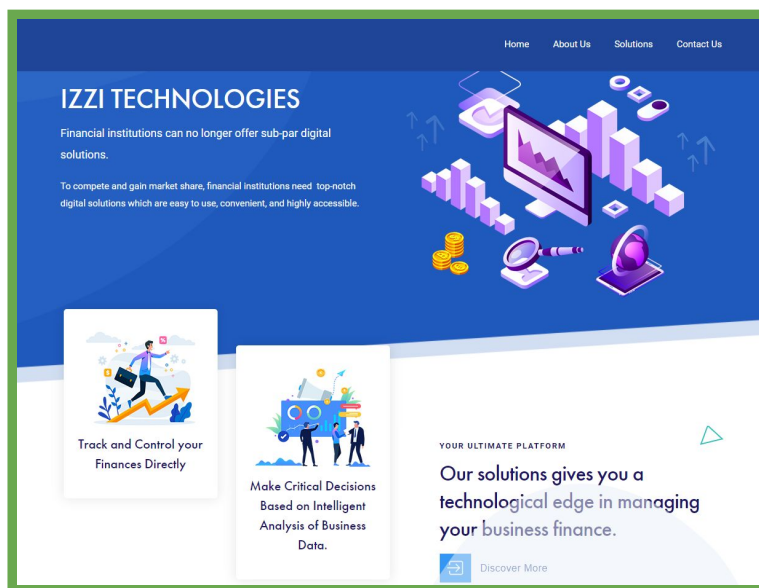

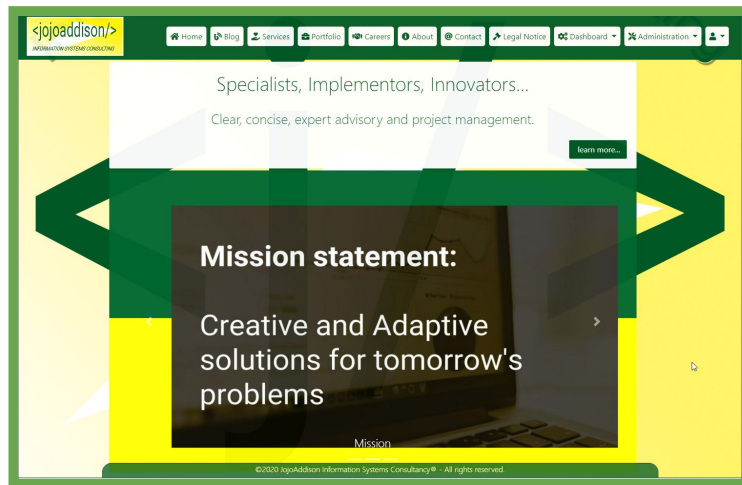

Search & Retrieve on-demand, Automated Visualization, Profiling, Analysis and Reporting

Data ETLAP - Crawlers, Parsers, Correlation Engines, Storage Nodes

Example Sources - Facebook, G+, Yahoo, MSN, Twitter, LinkedIn, Public and Private Forums

Team

Kojo Ampia - Addison - Bsc.
(Software & Systems Engineer)
Managing Consultant

Kojo is passionate about building great products that make people's lives easier.

He wields over 10 years of experience strategizing innovative digital experiences for clients ranging from small startups to some of the world's biggest brands.

Born in Sekondi - Ghana, he enjoyed his early childhood years in Sekondi-Takoradi, grew up Accra - Ghana whilst attending secondary education at Mfantsipim school Cape Coast.

He currently lives in Vienna - Austria having studied at the Vienna University of technology.

He's an avid scrabble and chess player, football enthusiast and always excited to take on new challenges!

Kwesi is a meticulous master technician. With over 25 years of experience, his attention to detail means he delivers excellent work over and again.

Akosombo - Ghana is where the journey started for Kwesi. Having enjoyed his early childhood at Takoradi, he moved to Accra where he grew and obtained his formal education from Suhum Secondary Technical and Labone Secondary Schools.

After tertiary studies in electricals and electronics with Kumasi and Accra Polytechnic, Kwesi completed several computing and networking courses including a specialized study trip to Wiesbaden - Germany on Medical Diagnostic equipment.

As a natural tinkerer, he loves dismantling and reassembling electronic gadgets.

Kwesi Arku - Addison
(Electrical & Electronic Technician)
Partner Consultant

Kwabena Addai Frimpong - Bsc.
(Software Engineer)
Associate Consultant

Kwabena is a vibrant young man with a passion to learn and develop technologies that make lives better.

Having completed basic education with Mt. Olivet Methodist School, he progressed through St. Peters Senior High School, Nkwatia to the University of Ghana, Legon in Greater Accra, where he obtained his bachelor in Computer Engineering.

From then, he served his national duty with the Kofi Annan Center of Excellence in ICT, where his capacity to train and engage teams to tackle new challenges emerged.

Born in New-Tafo in the Eastern Region-Ghana, he relocated to Accra with his family where he spent most of his childhood years.

He currently lives in Tema, a devoted hockey player having played in high school and the university.

Kwabena enjoys constructive debating on important subjects from across the globe, especially from the Bible.

Nii Adjei Osae is an enthusiastic life long learner with a passion to increase his knowledge base for the purpose of problem solving.

His bachelor of science degree study in computer engineering took him on a journey focused on system analysis and software development.

He loves to program in Java.

One would most likely catch him passionately engaged in anime and RPG video games.

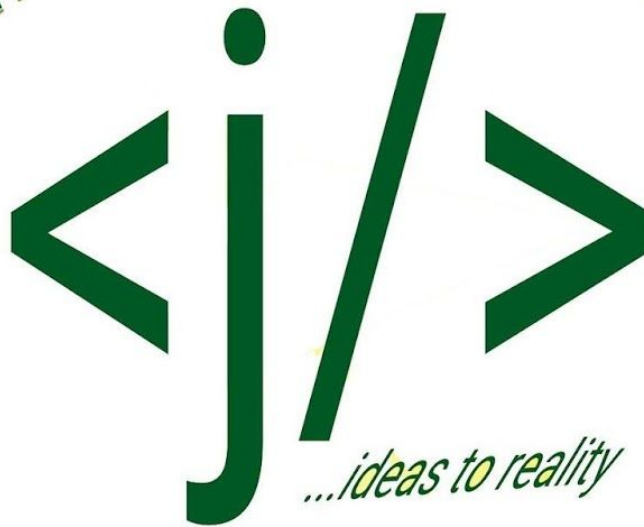

He is not afraid to step into any work field to have a feel of the experience so as to be able to provide optimized solutions to the working systems.

Nii Adjei Osae - Bsc.
(Software Engineer)
